About Me

I am a multiplatform software developer with vast experience in a lot of technology fields, mainly focused in web applications development and desktop or mobile applications. Besides, I have great knowledge about networking, database management, design and technical support abilities

Experience

DMU Hospitality Furniture 2021 - 2021
Internship developer

I designed, coded and implemented a web application made with Vanilla JavaScript, HTML, CSS and other libraries to help me out reaching my objective. The main functionality of this web app was to generate virtual credentials for the employees of the business.

Education

2019-2023

Universidad Tecnologica De La Laguna Durango

Engineering degree in Information and Communication Technologies

Skills

● JavaScript	● Git	● NoSQL
● C#	● .NET	● JSON
● React	● BootStrap	● PHP
● SQL	● CSS	● Laravel
● Kotlin	● HTML	● API REST

Personal Projects

Videogames Website
Made a website with HTML, CSS and JavaScript that fetch data from an API called RAWG. The website shows a large list of games and details about them.

PokeDex Android Application
Made a Pokedex Android application that uses an API created by me in EntityFramework C# to show the data about the 151 pokemons.

C# Minigame
Made a C# minigame that uses a bike to go through traffic. The bike must reach certain points to win or if you crash into an incoming car the game is over.

Languages

Spanish: Native Language

English: B2+
